

Summer Zoo Camp 2017 Week B Themes

Week B: June 19-23, July 10-14, July 24-28*

**6th-8th not available these weeks*

K-1st

Say What? Animal Communication

Can you hoot, screech, or clack like an owl? Ever tried bobbing your head or waving your foot like a bearded dragon? Even though animals don't use language like we do, they have some remarkable ways of communicating both with their own species and with other animals. Join us as we squawk, hiss, and growl our way through the week!

2nd-3rd

Wildlife Warriors

They don't build armor or weapons, so how do animals protect themselves and find the food they need to survive? There are any number of adaptations that can help them out, from teeth and tusks to spikes and talons and even poison and venom. We'll explore some built-in animal armories to learn some surprising ways that animals can take on the world.

4th-5th

Troops, Groups, and Herds

What do fish, birds, and termites have in common? They all find strength and safety in numbers. No matter if they are found in schools, flocks, or colonies, animals of all types group together in order to increase their chances of survival. Join us as we delve into some of nature's most fascinating gatherings.

6th-8th

Arts Alive (only available June 19-23 and July 10-14)

Calling all artists with a sense of adventure! Whether you're brand new to the world of art or an accomplished master, you won't want to miss this camp. Bring your artistic vision as we draw inspiration for our own works of art from the animals and gardens at the Zoo. We'll travel behind the scenes and meet animals up close to get a whole new perspective on some of our most inspiring animals and plants, which we will recreate with different techniques and materials. Along the way, we'll learn about the various ways art helps the Zoo achieve its mission of connecting guests to nature.
