

ALL AGES

A Touching Experience

This program was designed with special needs students and senior citizen groups in mind. Every audience benefits from the positive interaction and hands-on experiences in this multi-sensory encounter with a variety of animals. Emphasis is placed on respect for animals by creating a positive, hands-on experience.

Custom Programs

Don't see what you're looking for? We can customize a program to fit the needs of your students. Please contact our School Programs Specialist whitetreec@jacksonvillezoo.org

Student Conservation Programs

Protecting Our Planet programs are designed to give your students a more in depth and hands-on learning experience to better understand the conservation issues facing wildlife today. Each program includes three visits at your school by a Zoo Educator and one field trip to the Zoo spread out over several weeks or months. Programs are available for students K-12th grade and will be tailored to the age and needs of your group.

Saving Wildlife Through Mascots

Are your students the "Fighting Jaguars"? Do they have "Eagle Pride"? Your students can harness their school spirit into helping save animals through a hands-on conservation project. This program matches your students with local and international organizations working to protect and save your school mascot in the wild. Your Zoo visit will include a special keeper talk and/or behind the scenes tour.

Pollinator Protectors

Join the Jacksonville Zoo and Gardens to help save pollinators! Students will be learning about the importance of pollinators and creating their own school yard pollination garden with the help of Zoo staff. Your Zoo visit will include a guided garden tour.
